

Mixed Lists & Numbering

This example captures a common “breaks everywhere” pattern: numbered lists with nested bullets, mixed list types, continuation detail, and numbering restart after a heading.

Steps

1. First step
 1. Detail bullets under step 1
 - â–ª First nested bullet under step 1 detail
 - â–ª Second nested bullet under step 1 detail
 - Continuation text that belongs to the prior bullet item and must align to the list text start.
1. Second step
 1. Nested notes under step 2
 - â–ª A nested bullet that wraps cleanly when the text is long enough to exceed the content width and must remain aligned to the text start for wrapped lines.

Restart

After a heading, ordered list numbering restarts.

1. Step one after restart
2. Step two after restart
